of the
United States of America

AT THE SECOND SESSION

*Begun and held at the City of Washington on Tuesday,
the twenty-fifth day of January, one thousand nine hundred and ninety-four*

An Act

To provide for the settlement of the water rights claims of the Yavapai-Prescott Indian Tribe in Yavapai County, Arizona, and for other purposes.

*Be it enacted by the Senate and House of Representatives of
the United States of America in Congress assembled,*

**TITLE I—YAVAPAI-PRESCOTT INDIAN
TRIBE WATER RIGHTS SETTLEMENT**

SEC. 101. SHORT TITLE.

This title may be cited as the “Yavapai-Prescott Indian Tribe Water Rights Settlement Act of 1994”.

SEC. 102. CONGRESSIONAL FINDINGS AND DECLARATIONS.

(a) FINDINGS.—The Congress finds that—

(1) it is the policy of the United States, in fulfillment of its trust responsibility to the Indian tribes, to promote Indian self-determination and economic self-sufficiency, and to settle, wherever possible, the water rights claims of Indian tribes without lengthy and costly litigation;

(2) meaningful Indian self-determination and economic self-sufficiency depend on the development of viable Indian reservation economies;

(3) quantification of rights to water and development of facilities needed to utilize tribal water supplies effectively is essential to the development of viable Indian reservation economies, particularly in arid western States;

(4) on June 7, 1935, and by actions subsequent thereto, the United States established a reservation for the Yavapai-Prescott Indian Tribe in Arizona adjacent to the city of Prescott;

(5) proceedings to determine the full extent of Yavapai-Prescott Tribe's water rights are currently pending before the Superior Court of the State of Arizona in and for Maricopa County, as part of the general adjudication of the Gila River system and source;

(6) recognizing that final resolution of the general adjudication will take many years and entail great expense to all parties, prolong uncertainty as to the full extent of the Yavapai-Prescott Tribe's entitlement to water and the availability of water supplies to fulfill that entitlement, and impair orderly planning and development by the Tribe and the city of Prescott; the Tribe, the city of Prescott, the Chino Valley Irrigation

District, the State of Arizona and the United States have sought to settle all claims to water between and among them;

(7) representatives of the Yavapai-Prescott Tribe, the city of Prescott, the Chino Valley Irrigation District, the State of Arizona and the United States have negotiated a Settlement Agreement to resolve all water rights claims between and among them, and to provide the Tribe with long term, reliable water supplies for the orderly development and maintenance of the Tribe's reservation;

(8) pursuant to the Settlement Agreement and the Water Service Agreement, the quantity of water made available to the Yavapai-Prescott Tribe by the city of Prescott and the Chino Valley Irrigation District will be secured, such Agreements will be continued in perpetuity, and the Tribe's continued on-reservation use of water for municipal and industrial, recreational and agricultural purposes will be provided for;

(9) to advance the goals of Federal Indian policy and to fulfill the trust responsibility of the United States to the Tribe, it is appropriate that the United States participate in the implementation of the Settlement Agreement and assist in firming up the long-term water supplies of the city of Prescott and the Yavapai-Prescott Tribe so as to enable the Tribe to utilize fully its water entitlements in developing a diverse, efficient reservation economy; and

(10) the assignment of the CAP contract of the Yavapai-Prescott Tribe and the CAP subcontract of the city of Prescott is a cost-effective means to ensure reliable, long-term water supplies for the Yavapai-Prescott Tribe and to promote efficient, environmentally sound use of available water supplies in the Verde River basin.

(b) DECLARATION OF PURPOSES.—The Congress declares that the purposes of this title are—

(1) to approve, ratify and confirm the Settlement Agreement among the Yavapai-Prescott Tribe, the city of Prescott, the Chino Valley Irrigation District, the State of Arizona and the United States;

(2) to authorize and direct the Secretary of the Interior to execute and perform the Settlement Agreement;

(3) to authorize the actions and appropriations necessary for the United States to fulfill its legal and trust obligations to the Yavapai-Prescott Tribe as provided in the Settlement Agreement and this title;

(4) to require that expenditures of funds obtained through the assignment of CAP contract entitlements by the Yavapai-Prescott Tribe and Prescott for the acquisition or development of replacement water supplies in the Verde River basin shall not be inconsistent with the goals of the Prescott Active Management Area, preservation of riparian habitat, flows and biota of the Verde River and its tributaries; and

(5) to repeal section 406(k) of Public Law 101-628 which authorizes \$30,000,000 in appropriations for the acquisition of land and water resources in the Verde River basin and for the development thereof as an alternative source of water for the Fort McDowell Indian Community.

(i) CONSERVATION MEASURES.—(1) Measures considered for implementation in the Basin Conservation Program may include, among others, conveyance and distribution system monitoring, automation of water conveyance systems, water measuring or metering devices and equipment, lining and piping of water conveyance and distribution systems, on-district storage, electrification of hydraulic turbines, tail-water recycling, consolidation of irrigation systems, irrigation scheduling, and improvement of on-farm water application systems. Basin Conservation Program funds may also be used throughout all four phases of the Basin Conservation Program to mitigate for adverse impacts of program measures.

(2) In addition to implementing existing technologies, the Secretary shall encourage the testing of innovative water conservation measures. The Secretary shall, to the maximum extent possible

under applicable Federal, State, and tribal law, cooperate with the State of Washington to facilitate water and water right transfers, water banking, dry year options, the sale and leasing of water, and other innovative allocation tools used to maximize the utility of existing Yakima River basin water supplies.

(3) The Secretary may, consistent with applicable law, use funds appropriated to carry out this section for the purchase or lease of land, water, or water rights from any entity or individual willing to limit or forego water use on a temporary or permanent basis. Funds used for purchase or lease under this paragraph are not subject to the cost sharing provisions of subsection (d). Efforts to acquire water should be made immediately upon availability of funds to meet the three-year goal specified in section 1205(a)(4) to provide water to be used by the Yakima Project Superintendent under the advisement of the System Operations Advisory Committee for instream flow purposes. The use of Basin Conservation Program funds under this paragraph are in addition to those specifically authorized to be appropriated by subsection (j)(4).

SEC. 1205. OPERATION OF YAKIMA BASIN PROJECTS.

(a) WATER SAVINGS FROM BASIN CONSERVATION PROGRAM.—
 (1) The Basin Conservation Program is intended to result in reductions in water diversions allowing for changes in the present operation of the Yakima Project to improve stream flow conditions in the Yakima River basin. Except as provided by paragraph (5) of this subsection and section 1209, commencing with the enactment of this title, and notwithstanding that anticipated water savings are yet to be realized, the Secretary, upon the enactment of this title and acting through the Yakima Project Superintendent, shall (A) continue to estimate the water supply which is anticipated to be available to meet water entitlements; and (B) provide instream flows in accordance with the following criteria:

Water Supply Estimate for Period (million acre feet):				Target Flow from Date of Estimate thru October Downstream of (cubic feet per second):	
April thru September	May thru September	June thru September	July thru September	Sunnyside Diversion Dam	Prosser Diversion Dam
(1) 3.2	2.9	2.4	1.9	600	600
(2) 2.9	2.65	2.2	1.7	500	500
(3) 2.65	2.4	2.0	1.5	400	400
Less than line 3 water supply				300	300

(2) The initial target flows represent target flows at the respective points. Reasonable fluctuations from these target flows are anticipated in the operation of the Yakima Project, except that for any period exceeding 24 hours—

(A) actual flows at the Sunnyside Diversion Dam may not decrease to less than 65 percent of the target flow at the Sunnyside Diversion Dam; and

(B) actual flows at the Prosser Diversion Dam may not decrease by more than 50 cubic feet per second from the target flow.

(3) The instream flows shall be increased for interim periods during any month of April through October to facilitate when necessary the outward migration of anadromous fish. Increased instream flows for such interim periods shall be obtained through voluntary sale and leasing of water or water rights or from conservation measures taken under this title.

(4)(A)(i) Within the three-year period beginning when appropriations are first provided to carry out the Basin Conservation Program, the instream flow goal in the Yakima River is as follows: to secure water which is to be used for instream flows to facilitate meeting recommendations of the System Operations Advisory Committee for flushing flows or other instream uses.

(ii) In addition to any other authority of the Secretary to provide water for flushing flows, the water required to meet the goal specified in clause (i) shall be acquired through the voluntary purchase or lease of land, water, or water rights and from the development of additional storage capability at Lake Cle Elum provided for in section 1206(a).

(iii) In addition to water required to meet the instream flow goal specified in clause (i), the System Operations Advisory Committee may recommend additional water to meet instream flow goals pursuant to judicial actions.

(B) After the period referred to in subparagraph (A), such instream flow goal is modified as follows:

(i) The goal increases so that the instream target flows specified in the table in paragraph (1) increase by 50 cubic feet per second for each 27,000 acre-feet of reduced annual water diversions achieved through implementation of measures under the Basin Conservation Program. Such increases do not apply to actions taken pursuant to section 1204. Such increases shall not further diminish the amount of water that otherwise would have been delivered by an entity to its water users in years of water proration.

(ii) The goal changes directly with the availability of water resulting from Federal expenditures under this title for purchase or lease of water under this title.

(C) The Yakima Project Superintendent shall maintain an account of funded and completed conservation measures taken under the Basin Conservation Program.

(D) No later than March 31 of each calendar year, the Yakima Project Superintendent shall meet with the State of Washington, Yakama Indian Nation, and Yakima River basin irrigators to mutually determine total diversion reductions and respective adjustments to the target flows referred to in this subsection. The Yakima Project Superintendent shall announce such adjustments with the announcements of Total Water Supply Available. For the purposes of this subparagraph, conserved water will be considered available for adjusting target flows in the first year following completion of a measure or following a result from the post implementation monitoring and evaluation program, as the case may be.

(5) Operational procedures and processes in the Yakima River basin which have or may be implemented through judicial actions shall not be impacted by this title.

(6)(A) Within three years after the date of enactment of this Act, the Secretary shall conduct a study and submit a report with recommendations to the appropriate committees of the Congress on whether the water supply available for irrigation is adequate to sustain the agricultural economy of the Yakima River basin.

(B) The target flows provided for under this subsection shall be evaluated within three years after the date of enactment of this Act by the Systems Operations Advisory Committee for the purpose of making a report with recommendations to the Secretary and the Congress evaluating what is necessary to have biologically-based target flows.

(C) The recommendations and reports under subparagraphs (A) and (B) shall provide a basis for the third phase of the Yakima River Basin Water Enhancement Project.

(b) WATER FROM LAKE CLE ELUM.—Water accruing from the development of additional storage capacity at Lake Cle Elum, made available pursuant to the modifications authorized in section 1206(a), shall not be part of the Yakima River basin's water supply as provided in subsection (a)(1). Water obtained from such development is exclusively dedicated to instream flows for use by the Yakima Project Superintendent as flushing flows or as otherwise advised by the System Operations Advisory Committee. Water may be carried over from year-to-year in the additional capacity to the extent that there is space available. Releases may be made from other Yakima Project storage facilities to most effectively utilize this additional water, except that water deliveries to holders of existing water rights shall not be impaired.

(c) STATUS OF BASIN CONSERVATION PROGRAM FACILITIES.—Measures of the Basin Conservation Program which are implemented on facilities currently under the administrative jurisdiction of the Secretary, except as provided in section 1204, shall be considered features of the Yakima River Basin Water Enhancement Project, and their operation and maintenance shall be integrated and coordinated with other features of the existing Yakima Project. The responsibility for operation and maintenance and the related costs shall remain with the current operating entity. As appropriate, the Secretary shall incorporate the operation and maintenance of

such facilities into existing agreements. The Secretary shall assure that such facilities are operated in a manner consistent with Federal and State law and in accordance with water rights recognized pursuant to State and Federal law.

(d) **WATER ACQUIRED BY PURCHASE AND LEASE.**—Water acquired from voluntary sellers and lessors shall be administered as a block of water separate from the Total Water Supply Available, in accordance with applicable Federal and State law.

(e) **YAKIMA PROJECT PURPOSE.**—(1) An additional purpose of the Yakima Project shall be for fish, wildlife, and recreation.

(2) The existing storage rights of the Yakima Project shall include storage for the purposes of fish, wildlife, and recreation.

(3) The purposes specified in paragraphs (1) and (2) shall not impair the operation of the Yakima Project to provide water for irrigation purposes nor impact existing contracts.
